Addendum to page 4 of Registration for judging purposes

Class, Type, & Judging Info 2025:

For a boat to be judged, it must be in the water under its own power. It should arrive at the dock under its own power unless there is no dock space and/or at the discretion of the chief judge. (as per ACBS judge system guidelines (rev. Feb. 2017)).

•

Types of boats to be added to page 3 of the Registration Form:

- Powered ... launch, runabout, utility (see below) **
- Non-powered
- Cruisers and Commuters
- Outboards and engines
- Fiberglass and non-wood, inboard power
- Non-wood outboard boat and motor
- Non-wood non-powered
- Outboard boat and motor with steering
- Outboard boat and motor without steering
- Contemporary

Please keep the following in mind when you register your boat:

****Runabout versus utility** - If the engine is under the deck, it's a runabout. If the engine is under a box it's a utility. Lyman called many of their boats runabouts. For judging purposes it's classified as a utility.

Preserved versus restored- Here's the information from the ACBS judging rules:

ACBS defines preserved boats as those containing at least 60% of their original deck and topsides material and are constructed using the same methods and materials as the original. Bottom replacement is expected for the boat to be serviceable, but the method of replacement must duplicate the original. The use of plywood as the inner bottom when not used by the original builder will cause the boat to be classified as restored.

The choice of bedding compound or sealant between the plies of the bottom is immaterial; any suitable material is acceptable in preserved and restored boats — bedding compound and canvas, "5200", epoxy or anything the restorer and owner select. Similarly, the use of plywood underlayment in decks or topsides will also result in the classification of the boat as restored. Boats with less than 60% of their original deck and topsides material or restored using non-traditional methods or materials are defined as restored.
